

NOTES:  
1. See Anchor Details drawing for Typical Decorative Plate 6".  
2. See color chart for available options.  
3. 3" jet cover sold separately.

INSTALLATION RECOMMENDATIONS:  
1. It is essential that the water line be oriented as indicated on plan.  
2. Align "E-E" marks on structure's flange with water line as indicated on plan.  
3. It is recommended to electrically ground all play components.

MAINTENANCE:  
When switching winter cover to spray cap (or vice versa):  
1. After removing tamper-proof screws from the winter cover and spray cap, use a 3/8"-16 bolt to remove it.  
2. Use non water-based anti-seize lubricant (LOCTITE 76764) on 1/4"-20 screw threads.  
3. Use a small coat of silicone-based lubricant on cover's O-ring.

Medium Bell is built out of a 3mm thick, stainless steel, Ø24" [600mm] hemisphere. The jet cover is sold separately. Tamper-proof hardware requires a special tool provided by the manufacturer. The structure is covered with a non-slip coating. None of the components contain any heavy metals. Everything fully complies with National Plumbing Code (NPC) requirements. Plumbing and slab sub-base by others.
