

WHEEL ACTIVATOR

1070

DESCRIPTION

The Wheel is a game designed to sequence waterings. The selector, connected to three structures or jets on the ground, allows only two to be activated at a time. By turning the four translucent polymer handles of the selector, the user chooses which components will be activated or not. Positioned on a base adapted to a drain, the wheel ingeniously optimizes space and user interactivity.

ADDITIONAL INFORMATION

Number of users : 1 - 2

Interaction : Yes

Water effect : N/A

Product type : AV-Activator

Installation : Embedded or unifix installation

PLAY VALUE

Childhood

Active
